MAJOR CLASSIFICATION INDEX OF ARTICLES

ANALYTICAL METHODS

Isotope dilution ICP-MS analysis of Pt in road dust 1123-1129

ENERGY RESOURCES

Petroleum and natural gas

C isotope systematics of individual hydrocarbons in hydrothermal petroleum, NE Pacific Ocean 1429–1433
Dissolved organic C in sediment interstitial waters, NE Pacific 1495–1502
He and C gas geochemistry of pore fluids in the hydrothermal system of Escanaba Trough 1457–1466.
Hydrothermal alteration of organic matter in sediments of the NE Pacific Ocean: Part 1 1401–1428
Hydrothermal alteration of organic matter in sediments of the NE Pacific Ocean: Part 2 1467–1494
Kinetic studies of asphaltene pyrolyses and their geochemical applications 1529–1541
Organic geochemistry of oils from southern Cuba 1–10
Origin of CH_4 in quartz crystals from the Tertiary accretionary wedge and fore-arc basin of the Western Carpathians 1259–1271

ENVIRONMENTAL GEOCHEMISTRY

Adsorption of Mo on anatase from dilute solutions 649–656
Assessing mine drainage pH from colour and spectral reflectance of precipitates 1273–1286
Assessment of metal loads in watersheds affected by acid mine drainage 1183–1207
Changes in sorption capacity of coastal plain sediments due to redox alteration of mineral surfaces 387–398
Colloid chemistry of acid rock drainage from an abandoned Zn-Pb-Ag mine 633–648
Comparison between metals released by a 3-step sequential extraction procedure and dilute HCl from soil and road dust 353–367
Contaminant metal dispersion from a disused mine, use of concentration gradients and Pb isotope ratios 1093–1103
Contrasting the geochemistry of oxic sediments across ecosystems 1563–1582
Coprecipitation of trace metals with Fe, Al and Mn in waters contaminated with AMD 569–581
Distribution and origin of Pt group elements in fluvial sediments of the Kentish Stour, UK 1115–1121
Environmental impact of ash management in coal-based power generation 1131–1141
Experimental soil acidification 245–257
Factors contributing to lake salinity, Riske Creek, BC, Canada 605–619
Fine-grained sediments associated with AMD in Fe-Cu mine area 1081–1092
Geochemistry of abandoned Hg mines in Nevada, USA 1069–1079

Fine-grained sediments associated with AMD in Fe-Cu mine area 1081–1092
Geochemistry of abandoned Hg mines in Nevada, USA 1069–1079

Geochemistry of agricultural acid sulphate soils in an artificially drained area 1209–1218
Geochemistry of contaminated fjord sediments near a former Pb-Zn mine 493–502
Geological analogue for circumneutral mine tailings: implications for long-term storage 1105–1114
Heavy metal distribution in sediments of the Tietê-Pinheiros River, São Paulo, Brazil 105–116
Hydrological control of Sr in stream water 285–300
Infrared spectroscopic study of As (V) adsorption from mine waters 445–454
Mercury interactions in a simulated Au placer 21–28
Natural and anthropogenic Pb in sediments of the German Bight 621–632
Natural and anthropogenic SO_4 in the Arno River, Tuscany, Italy 79–92
Ozonation of diesel fuel in unsaturated porous media 1165–1170
Properties of Fe oxides in streams draining the Loess Uplands of Mississippi 409–419
Rates of SO_4 reduction and sulphide precipitation in a permeable reactive barrier 301–320
Retention and release of Mn in an organic-rich catchment 1061–1067
Role of sediment composition in trace metal distribution in lake sediments 1171–1181
Sorption of trace metals to an Al precipitate in a stream receiving acid rock drainage 421–430
Spatial and temporal variability of trace elements in an urban subtropical watershed 475–492
Use of fly ash in a geopolymeric material 1143–1148
Use of modified coal ash as a sorbant for organic waste streams 1159–1164
Use of non-radioactive isotopes for studying accumulation of Zn, Cd and Pb in mussels 1351–1360
Use of $^{87}Sr/^{86}Sr$ as an environmental tracer 1543–1550

Diagenesis

Chemical reactions and porosity change during diagenesis 39-47

Geochemical mapping

Baselines of some bioavailable and total heavy metals in Finland 975–980
Distribution of heavy metals and As in soils of Aragón, Spain 961–971
Factor analysis applied to regional geochemical data 185–206

Geochemistry and health

Geochemistry and mineral nutrition of livestock and wildlife 1017–1028
Geochemistry of soil and grass at Shimba Hills National Reserve, Kenya 1003–1016
Oxidation and toxicity of Cr in ultramafic soils in Zimbabwe 981–986
Risk assessment of high Pb loads in soils around Lavrio, Greece 1029–1045

Groundwater

Arsenic and other inorganic constituents in groundwaters of La Pampa, Argentina 259–284
Fluid mixing in carbonate aquifers near Rapolano, Italy 1329–1342
Groundwater geochemistry of a small reservoir catchment in Tunisia 1047–1060

Isotopic and morphological features of fracture calcite from granitic rocks, use in paleohydrogeology 1241–1257
Major ion chemistry of groundwaters in the Continental Terminal water table, SW Niger 1343–1349
Redox-driven changes in porewater chemistry in a chalk aquifer beneath unlined slurry lagoons 903–921
S- and O- isotopes in dissolved SO_4 in the cover rock aquifers of a Zechstein salt dome 1515–1528
Solubility of $MnCO_3$ and $FeCO_3$ in anaerobic aquatic environments 503–511
Trace element distribution in US groundwaters 49–57
Use of SF_6 to label drilling air in unsaturated, fractured rock studies 1361–1370
Water-rock mass transfer in the generation of neutral and high pH spring waters in Genova, Italy 455–474

Radioactive waste disposal

Behaviour of Th, U, Pb and REE in a cryptokarstic halloysite and kaolinite deposit 1313–1328
Conceptual model of controls on water chemistry at Yucca Mountain, Nevada 793–805
Effects of drying on stability of $NaNd(CO_3)_2.6H_2O$ and $NaEu(CO_3)_2.6H_2O$ 1305–1312
Experimental study and modelling of sorption of U (VI) onto olivine 399–408
Geochemistry of rocks at the potential repository level, Yucca Mountain, Nevada 683–698
Geohydrology of Yucca Mountain, Nevada 659–682
Li-sorption to Yucca Mountain tuffs 819–824
Microbial, redox and organic characteristics of compacted clay-based buffer after 6.5 a of burial 1287–1303
Mineralogical heterogeneity in fractured, porous media 699–708
Percolation flux and transport velocity in the unsaturated zone, Yucca Mountain, Nevada 807–817
Physical and stable-isotope evidence for formation of secondary calcite and silica, Yucca Mountain, Nevada 735–750
Retention of humic substances on mineral surfaces and influence on Th mobility 1551–1562
Solubility and sorption of redox-sensitive radionuclides in water from Yucca Mountain 837–853
Tracer and radionuclide sorption to vitric tuffs of Busted Butt, Nevada 825–836
U-Pb ages of secondary silica at Yucca Mountain, Nevada: implications for paleohydrology 709–734
$^{234}U/^{238}U$ evidence for local recharge and groundwater flow, Yucca Mountain, Nevada 751–779
U-series disequilibrium in tuffs at Yucca Mountain, Nevada, evidence of pore fluid flow 781–792

Thermal water

Origin of thermal waters from western Turkey, geochemical constraints 163–183

Waste disposal

Carbonation processes in municipal solid waste incinerator bottom ash, effects on leaching of Cu and Mo 1503–1513
Self-sealing isolation and immobilization, disposal of waste acidic jarosite 93–103

Weathering

Amending highly weathered soils with finely ground basalt 987–1001
Calibration of the Na base cation dominance index for the River Dee, NE Scotland 11–19
Geochemistry and mineralogy of saprolite in Finnish Lapland 885–902
Tropical weathering of the Barama-Mazaruni greenstone belt, Guyana 321–336
Weathering rates calculated from spring water data: a case study 583–603

GENERAL GEOCHEMISTRY

Stability of Mg-Fe chlorites in hydrothermal solutions 1219–1239

Marine

Cyclicity in sediment deposition in the Gotland Basin, Baltic Sea 29–38
Effect of grain size on geochemistry of intertidal sediments 59–68
Organic C burial rates and C—S relationship in coastal sediments of the southern Baltic Sea 337–352
Pyritisation in anoxic fjord sediments 923–933

Mathematical

Outlier-resistant errors-in-variables regression: anomaly recognition 1149–1157

MINERAL RESOURCES

Fluid-rock interaction related to hydrothermal vein mineralisation in the Siegerland district, Germany 225–243
Geochemistry of fluids and sediments: relevance to hydrothermal circulation 1381–1399
Geochemistry of oil inclusions in sulphide-related calcites in a Pb-Zn deposit, Nova Scotia, Canada 69–77
Hydrothermal geochemistry of sediments and pore waters, Escanaba Trough 1435–1456.

Exploration

Enzyme leach soil analysis for epithermal Au exploration 367–385

MODELLING

Assessment of models for estimation of land-derived nitrogen to shallow estuaries 935–953
Geochemical model for removal of Fe (II) (aq) from mine water 431–443
Modelling interaction of bentonite with hyperalkaline fluids 207–223

REVIEWS

Biomass burning—a review of organic tracers for smoke 129–162
Glacier meltwater hydrochemistry 855–883
Review of source, behaviour and distribution of As in natural waters 517–568
